

NIRON *Clima*

The alternative to steel

Critical Cooling
Direct Liquid Cooling
Continuous Cooling

An efficient alternative, bearing in mind that around 40 % of the energy in these type of buildings is used for HVAC.

Product quality guarantee: **NIRON CLIMA RP** is developed to meet the existing needs of cooling systems, apart from being suitable for other applications due to its corresponding certification of potability.

Possibility of designing the installation with **NIRON CLIMA RP** pipes, in SDR11 and/or SDR17 according to the required specifications.

Pipe diameter range from 20 mm to 630 mm.

Technical advantages

- Total absence of corrosion.
- Low thermal conductivity.
- Absorption and acoustic insulation.
- Reduced installation times.
